Problem Statement : Design an HTML form that includes two fields: username and password. Write JavaScript code to show and hide the password.

HTML CODE :

```
<!DOCTYPE html>
<html lang="en">
<head>
   <meta charset="UTF-8">
   <meta name="viewport" content="width=device-width, initial-scale=1.0">
   <title>Show and Hide Password</title>
   <link rel="stylesheet" href="password.css">
</head>
<body>
   <div class="login">
      <div class="banner">
         <h1>Login</h1>
         <p>Show or hide your password while typing</p>
      </div>

      <form>
         <div class="field">
            <label for="username">Username</label>
            <input type="text" id="username" placeholder="Enter your username" autocomplete="username">
         </div>

         <div class="field">
            <label for="password">Password</label>
            <div class="pw-row">
               <input type="password" id="password" placeholder="Enter your password" autocomplete="current-password">
               <button type="button" id="toggleBtn" onclick="togglePassword()">Show</button>
            </div>
         </div>

         <p class="hint">Click Show to see what you typed, and Hide to cover it again.</p>
      </form>

   </div>

   <script>
      function togglePassword() {
         var box = document.getElementById("password");
         var btn = document.getElementById("toggleBtn");
         if (box.type === "password") {
            box.type = "text";
            btn.innerHTML = "Hide";
         } else {
            box.type = "password";
            btn.innerHTML = "Show";
         }
      }
